

HELPING DELIVER LIFE-CHANGING THERAPIES

PPD® FUNCTIONAL SERVICE PARTNERSHIP (FSP) SOLUTIONS
PROJECT DELIVERY

EXCEPTIONAL PROJECT MANAGEMENT IS THE KEY TO MEETING YOUR TIMELINES

Whether you need a full project delivery solution or highly skilled staff to complement your existing capabilities, it's essential to find a partner whose project delivery (PD) expertise you can trust to keep your studies tightly coordinated and running on schedule.

Through comprehensive project management expertise across all phases of development — available in a flexible functional service partnership (FSP) model — **PPD FSP Project Delivery Solutions** helps biotech, biopharmaceutical, and medical device organizations meet their clinical trial timelines. With a proven track record built from decades of experience, we deliver the right talent and expertise to deliver your projects on time — while providing much-needed resource flexibility, reliability, and continuity.

3,000+ project delivery experts in **50+** countries in all global regions

Support in **1,000+** indications in **29** therapeutic areas, including cell and gene therapy and rare diseases

Support for **450+** sponsors from biopharma, biotech, academia, and government

COMPREHENSIVE PROJECT MANAGEMENT EXPERTISE TO DELIVER YOUR PROJECTS ON TIME

With decades of PD experience and expertise, our staff are equipped to manage all aspects of your projects to ensure timelines are met. We specialize in both project management and clinical team management to support all phases of development – from pre-clinical and clinical to marketed products – with an uncompromising commitment to quality, reliability, and continuity.

EXPERT PROBLEM-SOLVERS, COMMUNICATORS, AND COLLABORATORS TO DRIVE ACCURACY AND EFFICIENCY

At PPD, we understand that having quality people driving projects in a collaborative team culture is what drives our clients' success. Exceptional customer service skills and the ability to understand and fit seamlessly into your team's culture and development goals are fundamental requirements for our project leads and line managers, and these skills are refined through continued training, coaching, and evaluation. In addition, our infrastructure is designed with minimal managerial layers to maximize efficiency, increase responsiveness, and streamline communication.

Project Delivery Leads

- Client-focused problem-solvers and effective communicators
- Adaptable and strategic thinkers who plan in detail but also pivot quickly
- Adept at assessing and assigning priorities and identifying potential risks
- Experienced in all phases of clinical project management, clinical development, and protocol design

Dedicated Line Managers

- Extensive knowledge and expertise in project management and client-embedded work situations
- Direct access to executive sponsors through minimal managerial layers
- Specially trained and experienced to support on-time project delivery
- Dedicated to accuracy and flexibility

FLEXIBLE PROJECT DELIVERY SOLUTIONS TAILORED TO YOUR SPECIFIC NEEDS

PPD's extensive PD expertise is cultivated from flexibly delivering all types of FSP engagements. Using best practices and lessons learned from our extensive experience, we're able to tailor an engagement model that fits your needs and evolves with those needs over time. Our solutions offer a customizable mix of systems, processes, oversight, and facilities — yours or ours — and the flexibility to embed staff within your workforce or take the business fully in-house.

“One Team” approach helps clients quickly and efficiently reach their targets

- PD strategies integrated with your goals and KPIs
- Clearly articulated roles, responsibilities, and communication processes
- Proactive identification and mitigation of risks

PPD ensures seamless collaboration when we work with your systems

Onboarding and Integration Programs
