

Overcome the challenges of biomarker-driven oncology trials using leading NGS technology and experienced clinical teams.

Achieve faster recruitment

THE FASTEST NGS

Oncomine™ NGS Solutions return results in as little as **24 hours**

THE ONLY AUTOMATED NGS

Enables **decentralized trials** at community sites

ELEVATED GLOBAL INSIGHTS INTO GENOMIC PROFILING

For better **study feasibility** and **site strategy**

Rectify under-identification of patients

COVERAGE AT 1,000+ GLOBAL SITES

Overlapping with PPD's **global clinical development footprint**

EXTENSIVE CLINICAL TRIAL EXPERIENCE

PPD has run **700 oncology studies** in the past five years

SMARTER ONCOLOGY RECRUITMENT

Together, PPD and Oncomine Solutions can help you improve biomarker-driven oncology trials.

Extensive
global clinical
oncology reach

Next-generation
sequencing

Meet expanded diversity requirements

LIQUID BIOPSIES

To **ease patient burden** and enable greater access to under-treated populations

DEEP PENETRATION INTO COMMUNITY SITES

Enabled by Genexus™ System adoption **beyond large academic centers**

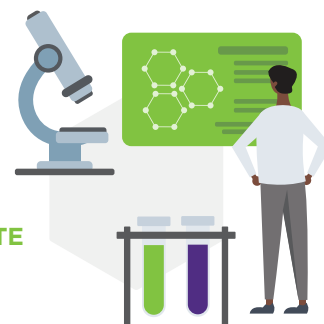

Overcome tissue management challenges

LOW SAMPLE INPUT REQUIREMENTS

To maximize tissue retention for **CDx development**

>95% SAMPLE SUCCESS RATE

Even with input as **low as 10 ng**

Choose PPD's clinical oncology experience, along with the power of Oncomine Solutions to identify more patients using NGS.

This combination empowers you to execute your precision oncology trials with confidence, while reducing outsourcing cost and complexity. Contact us to discuss the possibilities.
