

Overcome the challenges of biomarker-driven oncology trials using leading NGS technology and experienced clinical teams

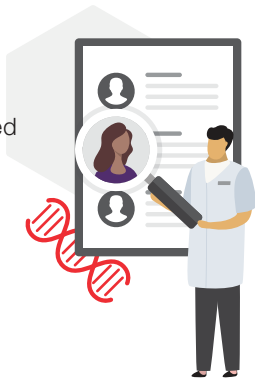

Achieve fast recruitment

Next-day NGS

OncoPrint™ Solutions can return NGS results in as little as **24 hours**

Automated NGS enables decentralized trials at community sites

Elevated global insights into **genomic profiling** for better **study feasibility** and **site strategy**

Rectify under-identification of patients

Coverage at **1,000+ global sites** overlapping with our **global clinical development footprint**

Extensive clinical trial experience with **700 oncology** studies in the past five years

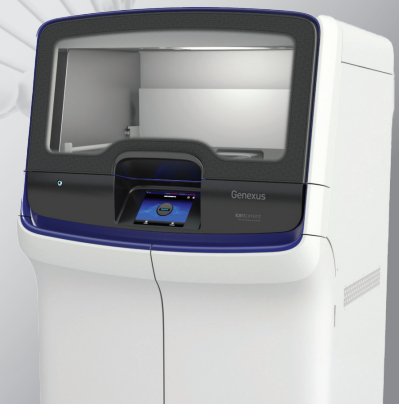

Smarter oncology recruitment

Together, PPD services and OncoPrint Solutions can help you improve biomarker-driven oncology trials

Extensive global clinical oncology reach

Next-generation sequencing

Meet expanded diversity requirements

Liquid biopsies to ease patient burden and enable greater access to under-treated populations

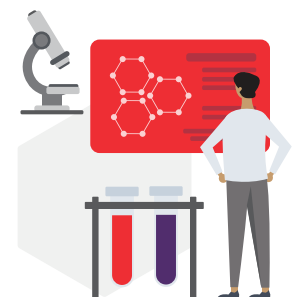

Deep penetration into community sites enabled by the adoption of the Ion Torrent™ Genexus™ Dx System **beyond large academic centers**

Overcome tissue management challenges

Low sample input requirements to help maximize tissue retention for **CDx development**

>95% sample success rate even with input as **low as 10 ng**

Choose our clinical oncology experience, along with the power of OncoPrint Solutions, to identify more patients using NGS.

This combination empowers you to execute your precision oncology trials with confidence, while reducing outsourcing cost and complexity.
