

Biotech solutions

Find perfect chemistry

Biotech-first solutions from
start-up to submission

Progress is never simple

On the leading edge of innovation, biotech companies must navigate a significant range of strategic and operational challenges when advancing a new therapy.

Achieving success with leaner teams, limited resources and accelerated timelines

Raising capital while maintaining development momentum

Building data-driven confidence with investors and regulators both now and into the future

Success takes more than a capable CRO solutions provider. It takes a biotech-first partner with the right global resources and foresight—like the PPD™ clinical research business of Thermo Fisher Scientific—to adapt as you evolve.

You need perfect chemistry to advance

Built for biotech. Ready for what's next.

Biotech innovation is built on bold ideas. That's why the PPD™ Biotech Solutions team brings biotech-first solutions to support your program's progress at every phase, in any therapy area, anywhere in the world. From study start-up to global regulatory submission, our scalable services are built to enable you to adapt and grow with precision and agility.

- Personal attention from a dedicated team, start to submission, with executive sponsors and seasoned professionals
- A biotech-specialized model built to serve biotech and small pharma with flexibility and consistency
- Scalable, full-service solutions that adapt to your needs across clinical development

Our approach allows
for early access
to data to support
your next round of
investor funding or
out-licensing of your
product.

From preclinical through commercialization, our partnership
fuels your momentum with perfect chemistry.

Our biotech mindset

Powered by the perfect chemistry.

We believe the best results happen when there's real chemistry. That's why we've built more than a model—we've built a mindset. One rooted in biotech-first precision, speed and shared ownership that makes collaboration seamless.

Our project teams are selected and trained to align with your pace and purpose, forming a trusted extension of your team that brings the perfect flow to every phase of development.

Biotech University

This customized certificate training program cultivates a biotech-first mindset across every team function. The core of this program is focused on entrepreneurial thinking, scientific rigor and adaptive decision-making, equipping team members to collaborate more intuitively with biotech innovators. Novel learning modules are paired with soft skill courses to provide a robust curriculum, ensuring chemistry at every level.

Dedicated medical and operational leaders

Our approach includes dedicated medical and operational leaders who are experts in guiding biotech companies through every stage of the clinical development process. Our solutions bring together our long history of biotech expertise and proven delivery solutions, all while infusing the voice of the customer into the project teams to drive successful delivery. Tap into our deep industry knowledge, strategic insight and hands-on experience to ensure seamless execution of your projects. From trial design to patient recruitment, our team works closely with you, offering personalized solutions and proactive support to help you navigate the complexities of clinical research, accelerate timelines and drive success.

Custom governance structures

Chemistry also requires structure. That's why we work with our clients to create customized governance structures that maximize partnership efficiencies while aligning with your goals and operating style. These structures typically include executive leaders from PPD Biotech services and can include a range of specific objectives such as:

- Greater prioritization and executive focus
- Identification and measurement of key performance indicators (KPIs)
- Processes that help achieve a client's goals, which may be tangential to the study we are running
- Establishing impactful communication and escalation pathways

Our broad experience and proven frameworks let us adapt fast, no reinvention required.

Global strength fit for biotech

Big resources, personalized for your path.

When you choose PPD Biotech services, you get biotech-first solutions backed by the full strength and capabilities of a leading global provider of CRO solutions.

- Greater prioritization and executive focus
- Full-service capabilities from early development through post-approval
- Rapid scalability powered by more than 24,000 global professionals
- Deep medical and regulatory expertise enhanced with a wealth of data and analytics to provide superior guidance across the development spectrum
- Comprehensive laboratory services to support seamless execution
- Extensive global patient and site networks to fuel enrollment and access
- Executive-level prioritization and biotech-first governance

We combine the global power of a leading CRO that is tailored to the unique needs of emerging biotech with the perfect balance of scale and personal support. Let's move your innovative therapies forward.
