

Infectious diseases

Your experienced infectious disease partner

The PPD™ clinical research business of Thermo Fisher Scientific offers more than 30 years of virology dominance combined with industry-leading experience and highly-tenured resources with much lower than benchmarked turnover. We leverage our proven track record of high client retention, personalized solutions and numerous success stories to ensure your business achieves long-term success and satisfaction.

When you partner with us, you benefit from our:

- 30+ years of broad antiviral and antibacterial development experience with a wide array of infectious disease subject matter experts
- Collaboration partnerships that provide integrated expertise for all phases of Accelerated Drug Development 360 solutions
- Access to experts across all functional areas including end-to-end manufacturing and supply chain solutions
- Focus on patient-centric solutions

In the past five years

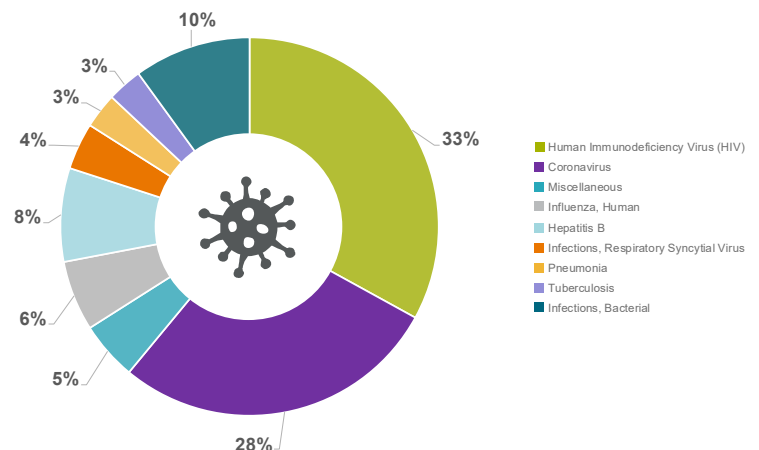

Infectious disease clinical research experience

Our industry-leading experience includes trials for the treatment of HIV, chronic hepatitis B and C, hepatitis D, RSV, influenza as well as various bacterial, fungal, and parasitic diseases.
