

# Unlocking efficiency with Preclarus central lab data integration

Our central lab can achieve study startup in 8-10 weeks — faster than the industry standard. We have more than **15 years of experience** integrating lab and clinical data in real-time. You can manage every aspect of your central lab clinical trial with our Preclarus™ clinical data portfolio solution.

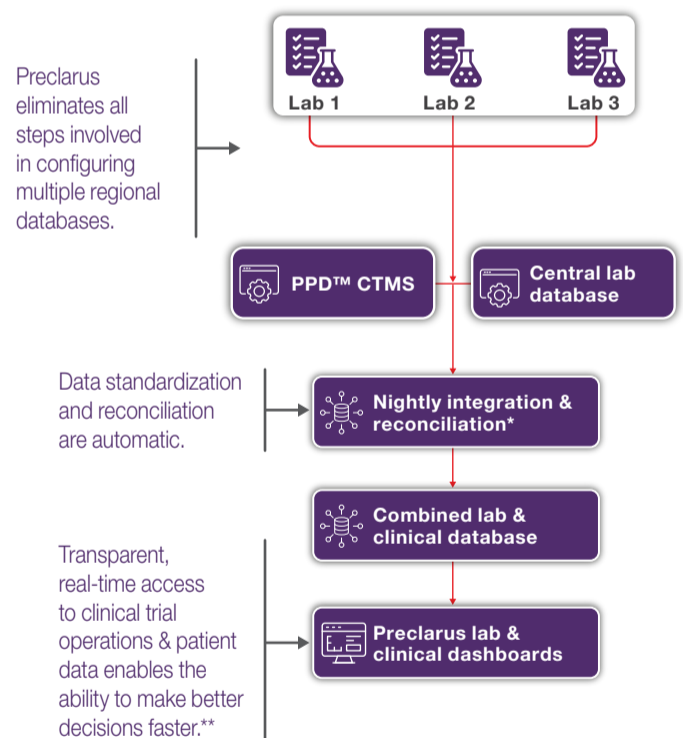

## Data Integration without Preclarus

- A complicated multi-step process
- Each lab location has a separate database for test results
- Work-intensive study closeout process

## Data Integration with Preclarus

- Real time access to integrated lab and clinical data
- Queries are reconciled in real time
- Integrated study closeout process

Our customers benefit from **15+ years of experience** integrating clinical and laboratory data and a closeout process that is up to 400 hours faster.

\* Only applicable when using the PPD™ clinical research business of Thermo Fisher Scientific services

\*\* All data is available for viewing in the dashboard across both systems when our in-house CRO services are used
