

Dermatology

Extensive dermatology experience and capabilities

In the rapidly evolving world of dermatology, innovative treatments represent a breakthrough in providing high-quality, cost-effective therapeutic options. At the PPD™ clinical research business of Thermo Fisher Scientific, we are at the forefront of dermatological research, harnessing cutting-edge technology and unparalleled expertise to bring advanced skincare solutions to market.

Proven leadership in dermatology clinical development

Over the past five years, we have successfully delivered more than **85 dermatology clinical trials** across multiple phases of development, supporting programs in key indications such as atopic dermatitis, psoriasis, alopecia areata, and other inflammatory and immune-mediated skin disorders.

With experience spanning across **1900+ investigative sites**, and engaging **thousands of patients** globally, our dermatology teams combine deep therapeutic expertise with operational excellence to accelerate study timelines while maintaining the highest standards of quality and regulatory compliance.

From early-phase proof-of-concept studies to pivotal Phase III programs and post-authorization commitments, we partner with sponsors to bring innovative dermatologic therapies to patients faster and more efficiently.

Broad indication expertise in dermatology clinical studies

We continue to expand our areas of expertise to ensure sponsors receive the highest quality and most efficient clinical study design, management, and operations.

Our comprehensive dermatology experience spans a broad range of indications including:

- Atopic Dermatitis
- Psoriasis
- Hidradenitis suppurativa
- Alopecia
- Pruritus & Prurigo Nodularis
- Chronic Urticaria (CSU and CIndU)
- Pemphigus vulgaris
- Bullous Pemphigoid
- Epidermolysis bullosa
- Dermatomyositis
- Cutaneous Lupus
- Aesthetics
- Rare skin manifestations

An experienced team that will keep your dermatology development on track

Dedicated dermatology expertise

Our global dermatology team is comprised of nearly **2,500** experienced professionals. These professionals include a team of more than **270** project management experts serving as your key point of contact and responsible for overall project delivery and quality. We also provide medical monitoring by board-certified physicians, as well as dedicated data management and statistics team members with far-reaching dermatology study experience. With a retention rate of **95 percent** over the past three years, our experts are well-positioned to work together to execute successful dermatology trials.
