

## Women's health

## Experienced women's health team and capabilities

The PPD™ clinical research of business of Thermo Fisher Scientific has deep experience in the design, planning and execution of phase I-IV full service global trials across a broad range of women's health indications.

Our women's health team has substantial experience in key areas of women's health to **support studies across the full program life cycle including obstetrics, gynecology, reproductive health and urogynecologic indications**. We collaborate with sponsors to support regulatory approvals and ultimately improve patient outcomes.

We have an **extensive HEOR and late phase expertise** that allows us to explore key **market access** hypotheses with payers and advisors from around the world regarding **drug product profiles and evidence requirements**. Our **digital solutions and trial virtualization** are well equipped for women's health populations and legacy brand trials.

### Sponsors conducting clinical research in non-oncology women's health indications benefit from:

- Our experienced team of **board-certified obstetrics/gynecology, physicians, reproductive toxicologists, epidemiologists, regulatory affairs specialists and pharmacologists** can support drug developers in early engagement of study designs, outcome measures and a **patient centric approach** to ensuring trial attractiveness and understanding the patients' care journey.
- Access to a **global network of 5200+ WH sites (including wholly owned global site network)**, key opinion leaders (KOLs), with over 1 million subjects in pre-screened databases for several women's health indications which assures our clients a robust analysis of probability of trial success during design phase.
- Lean approach to managing studies, **leveraging digital solutions, telehealth, home nursing and industry leading project management technology**, Preclarus® to achieve time and cost efficiencies.
- **450+ women's health resources in clinical operations and project management across all global regions**

Additional areas of women's health expertise include **preventive and therapeutic vaccines, medical devices and diagnostics and drug/device combinations and pregnancy registries**.

## Our comprehensive women's health experience spans a broad range of indications including:

- Assisted Reproductive Technology
- Contraception
- Dysmenorrhea
- Endometriosis
- Disorders of uterine bleeding, Uterine fibroids, IVF
- Lactation Studies
- Medical devices and diagnostics
- Menopause (Vaso Motor Symptoms (VMS), Genito-Urinary Symptoms)
- Obstetric Complications
- Osteoporosis
- Poly Cystic Ovarian Syndrome
- Pregnancy Registries
- Sexual Dysfunction
- Urinary Incontinence (OAB/SUI)
- Uterine Cervical Dysplasia
- Vulvovaginal Vaginitis and Sexually Transmitted Infections (STI)
